xMAGIC Whitepaper

Welcome to our whitepaper

Magical Finance is a community of financial activists consisting of 3 trading instruments including stocks, forex & crypto, each team formed by selection by several masters in their field.

Vision

Build a solid team and achievers in the financial world that can make it easier for all people to invest

Mission

1. Focus on team targets to achieve the best results.

2. Routinely hold bonding events between team members.

3. Establish good communication with investors.

4. Prioritizing the interests of investors above the team.

After going through several stages such as team formation, division of tasks, setting the concept and several times doing trial, we finally decided to do a fundraiser and look for investors who are interested in joining together us to achieve passive income up to 9% every week.

Investors only need to purchase the tokens that we have released and store them according to the specified time limit has been determined, the investor will get a profit sharing according to a predetermined calculation

The developer will do his job by dividing the proceeds from the token sale into 3 parts, each instrument get the same value and the results obtained will be accumulated according to the agreed time limit With profit sharing which we think is fair enough for the developer team and investors, we will release the rules and regulations share the results in the next point

1. Profits from all instruments will be accumulated into one and will become the core value of the division reducing the value of capital.

2. Profit will be divided into two parts, one part for investors and the other part for developers with benchmarks The distribution listed is according to the event that applies.

   2.a ICE MODE, the ice mode event will be repeated without limitation on number and time, profit sharing with ratio 1:1 between investors and developers, where the share value for investors and developers is equal.

without depending on the amount of profit and the percentage of investor returns.

For example: the profit achieved by the developer team is 30,000 xrp, then 30,000 is divided into two and will be 15,000 for each part, one part will be distributed to all holder and another part belongs to the developer team.

Division formula

A=B

Profit= A + B

Description: letter A for define investor, and letter B to define developer

Nb: the value of profit is fluctuating

2.b   FIRE MODE, the fire mode event will be repeated without any limitations on the number and time, profit sharing with ratio 1 : ? Between investors and developers, where the share value for investors is fixed and has been determined at the beginning,

The distribution will prioritize the return value for investors, while the remainder of the total distribution value will become the property of the developers. (can be bigger investors, or vice versa,

depending on the amount of profit and the value of the percentage share investors)

For example: the profit achieved by the developer team is 30,000 xrp. Before sharing the profit, the developer team will do the calculation for the investor's return, if the return has been determined then the value of the distribution can be done, for example the return is 10% of the total holding token and if the total holding is 100,000xrp then the value is 10% is 10,000xrp, from the appearance of that value, the division will be carried out as follows, the profit of 30,000xrp is reduced 10,000 and will be directly distributed to investors, the rest of the distribution is the right of the developer team.

Division formula

B = Profit - A

Description: letter A to define investor, and letter B to define developer

Nb: Quantity profit is volatile. If the profit value is less than the amount of the reward to be distributed to investors, then the parties, the developer will make a

patch using the funds already owned by the developer team without reducing the capital value of 3 instruments

3. The percentage of investor profit sharing in the form of xMAGIC tokens to facilitate and speed up the developer in the process distribution.

4. Snapshot event is carried out according to the specified time.

5. Profit sharing in the form of xMAGIC tokens races on the price when the snapshot is done.

6. The developer has an inviolable calculation system.

7. Developer has full rights to determine the time and type of event.

We divide the capital into three instruments based on the experience we have gone through, and each instrument has the privilege it brings.

Crypto

We all know that cryptocurrencies have great volatility, we can achieve huge profits in an instant.

Forex

We all know that forex has the advantage that we can profit in all market conditions, be it sideways, bearish or bullish.

Stock Market

We all know that the stock market is safer to invest in if we do more research on companies which we will enter.

Why do we do IDO?

- For Cex listing payment.

- Marketing Payment.

- Creating Reward platforms.

- Robot activation   requires large of funds to achieve large profits and is distributed to holders every week.

Why do we use anonymous?

Because the image of southeast asia is already in a bad condition in this community. and we are here to change that image.

We ensure that after the IDO ends, we will display our identity.

We will show the real photo on the website after the ido is done. Stay tuned.

Our project originates from Singapore and Indonesia, someone from Singapore selected several Indonesian and Singaporean traders.

We have many robots in forex, We always update the development of our trading robot results transparently.

every profit generated, will be distributed to our holders every week.

we will share the profits fairly.

In the future we will create our own Reward platform, making it easier for our investors to access passive income.

Investors just need to buy **xMAGIC** tokens and enjoy profits from 3 instruments at once.
It's time to switch to **xMAGIC**, let us work and we enjoy the results together.

xMAGIC
We work and you sleep, we profit and you also.

Our Capital Journey
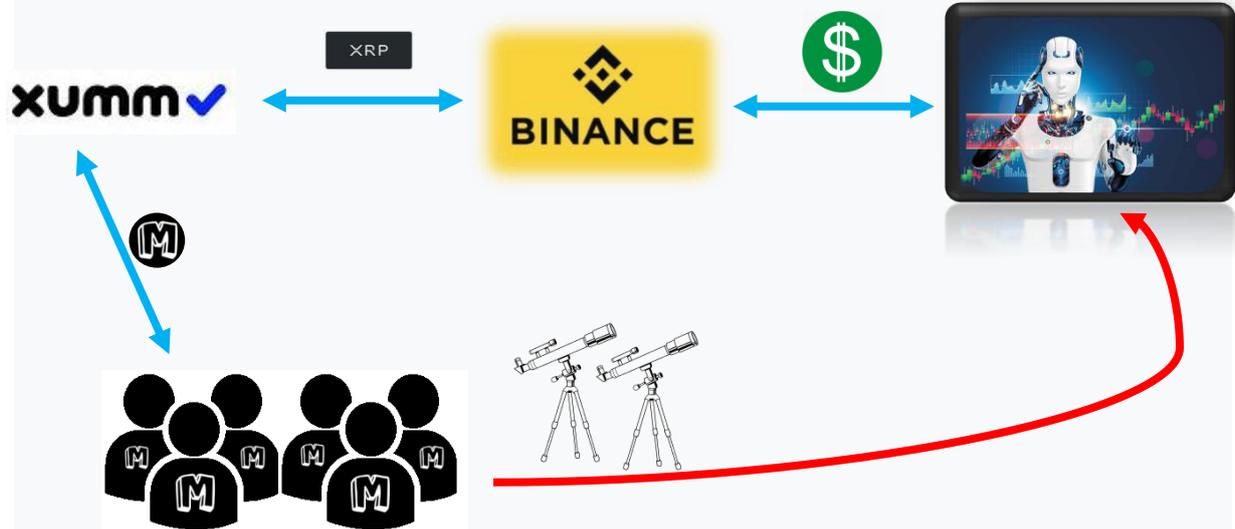

IMPORTANT :

    We will make withdrawals from **xMAGIC** Wallet for the purpose of depositing into the trading account without a specified date.

    After the profit target is reached, funds will be withdrawn from the trading account for deposit purposes to the **xMAGIC** wallet address.

    The funds available in the **xMAGIC** wallet will be used to repurchase **xMAGIC** tokens and or only limited to keeping the price from a sharp decline in the **xMAGIC** price.

    For the purpose of transparency and investor convenience, investors can also track the results of our robot trading.

    We will share a special investor password (READ ONLY) so that investors can monitor all kinds of activities on the **xMAGIC** trading account.

The profit generated by the **xMAGIC** robot is as follows:

- weekly rewards 7%.

- keep **xMagic** prices.

- Project development.

- Paying Teams involved.

- Provide 2% XRP guarantee to top 10 holders.

We will give **xMAGIC** Holder a special Password for Investors (READ ONLY).

We will share the password by contacting our Management (Telegram,Twitter,Discord), just provide the proof of your wallet address and take a screenshot as proof that you are an xMAGIC holder.
